FOR A STRONGER, UNIFIED REGIONAL NETWORK OF CARE

The mission of Project Access NOW is to improve our communities' health and well-being by creating access to care, services, and resources for those most in need.

Project Access NOW provides innovative, integrated support for patients and providers across Oregon and Southwest Washington. We work to increase access to health care and social services and to do so equitably.

Because Project Access NOW combines many multidisciplinary teams under one organization, our programs are much more effective than similar organizations who address only part of the solution.
